

COLD CUP LIDS

Graphic Packaging International offers a wide assortment of cold cup lids with a variety of functionalities and unique materials. Flat lids feature x-shaped straw slots that stay closed to reduce splashing and is easily separated when a straw is inserted. These lids also have pushdown buttons, allowing operators to mark the contents of the drink. Clear dome lids allow operators to add toppings above the fill line without crushing the product. The circular opening is wide enough to fit a straw, allowing consumers to enjoy their treat without removing the lid. This extensive range of lid offerings allow the consumer to have a choice of substrates to either comply with local legislative mandates or to simply have more options to pair with their beverage cup program.
