THE PERFECT SANITATION SOLUTION

Sanitation is of increasingly greater concern to operators in today's foodservice environment. Without proper procedures in place, it is nearly impossible to sustain the high level of cleanliness you expect and demand in your establishment. Shore Manufacturing has the perfect solution for your cleaning and sanitation needs. Our non-woven wiping towels are reusable, durable and disposable.

Shore Manufacturing

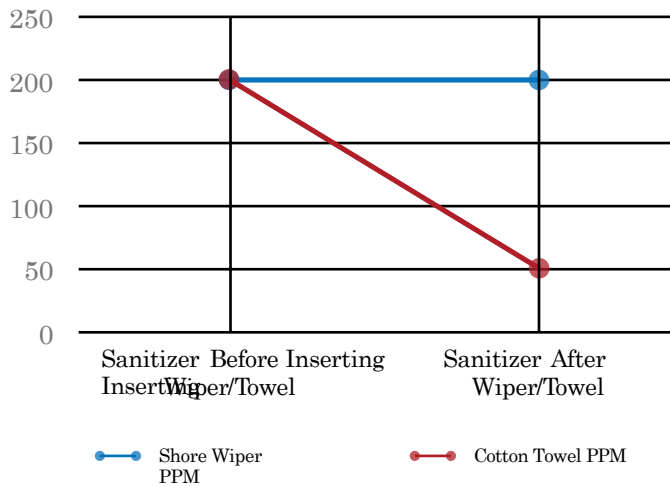

Disposable Quat Compatible Foodservice Wipes for
Cleaning and Sanitizing to Prevent Quat Binding

What is Quat Binding and why it must be prevented: Quaternary Ammonium Chloride (Quat) is an active ingredient in sanitizers that is used widely throughout the foodservice industry. When used properly, quat sanitizers can be very effective. But if used incorrectly, quat binding can occur, drastically reducing the sanitizing efficacy. This happens when the active ingredient (Quat) becomes attracted to and absorbed into fabrics. The result is not enough Quat ending up on the area it is supposed to be sanitizing.

Using cotton towels promotes “quat binding” which leaves your sanitizer without enough PPM to kill germs. The Shore wipes work effectively and leave your surfaces sanitized. For optimal cleaning and sanitizing begin using Shore wipes. See the test data below showing the Quat levels when using the Shore wipes vs. cotton towels. The sanitizer is not compromised when **delivered** to a surface when using a Shore wipe as opposed to a conventional cotton towel.

PPM
Comparison

Item#	SM0075Q	SM0071Q
Description	Quat Sanitizing FS Wipes	Quat Sanitizing FS Wipes
Wiper Size	13.25" x 21"	13.25" x 21"
Color	Blue	White
Case Pack	150	150

DISPOSABLE TOWEL ADVANTAGES

- * Premium wipes
- * Easy to use
- * Hygienic
- * Cost savings
- * Cloth-like qualities
- * Ease of storage
- * Can be used for multiple days
- * Highly absorbent to pick up debris and spills
- * Reduced cost versus linen rental towels
- * Color coding system for different areas of your establishment
- * Will rinse clean, dry fast and stay fresh longer than linen, allowing less time for bacteria growth
